Experience

Software Developer

SKYZ US

New York, NY

Dec/2025 - Present

- Developed and maintained internal web platforms for managing client intakes, billing workflows, and case-related information, improving operational efficiency for legal teams
- Built responsive, user-friendly frontend interfaces using modern JavaScript frameworks, ensuring secure and intuitive experiences for staff handling sensitive client data
- Designed and implemented dynamic intake and conversion funnels integrated with Google Ads to increase qualified traffic and consultation bookings
- Managed and optimized Google Ads campaigns, leveraging performance data to strategically target high-intent audiences and improve ROI
- Collaborated with overseas engineering teams to align frontend implementation with best SEO practices, performance optimization, and consistent UI standards
- Integrated **AWS Lambda** webhooks to handle external payment gateways, ensuring secure and scalable transaction processing.
- Managed cloud storage using **S3 buckets** and implemented secured **signed URLs** to protect sensitive client assets and documentation.

Software Developer

Dwellci AI

New York, NY

July/2025 - Nov/2025

- Developed and maintained core platform infrastructure leveraging GCP services to support AI-driven architectural design
- Engineered robust backend solutions with firebase, including firestore for data management, firebase authentication for secure user experiences, and firebase cloud functions for serverless logic
- Built the platform's user interface using React/react three fiber, focusing on intuitive tools for architectural professionals to generate and refine designs
- Facilitated seamless integration between frontend design tools and backend generative services, ensuring a cohesive user experience

Fullstack Developer

New York Auto Museum

New York, NY

Jan/2025 - Present

- Designed and developed responsive websites using HTML, CSS, and Javascript to improve user engagement and accessibility
- Collaborated with non-profit teams to gather requirements and deliver user-friendly, goal-oriented web solutions
- Maintained and updated website content, ensuring functionality and visual consistency across all browsers and devices
- Implemented basic SEO best practices to increase site visibility and traffic

Game Developer

ROTRK

New York, NY

Dec/2023 - Present

- Designed and developed highly immersive multiplayer games using the Godot engine, optimizing network performance for seamless player experiences
- Led cross-functional teams in developing innovative game features, reducing load times by 20%
- Developed and integrated advanced physics systems, increasing player engagement by 30% and enriching gameplay experience
- Developed a cross-platform game using Godot Engine, integrating SQLITE for local data storage and firebase for cloud-based authentication and real-time syncing of player data
- Spearheaded coordination of 50+ development tickets, resulting in 95% on-time delivery and alignment with project goals

Fullstack Developer

EzML

New York, NY

Feb/2023 - Jan/2024

- Developed an AI-integrated camera technology platform that enhanced user experience for over 500 users, resulting in positive feedback and improved engagement
- Enhanced loading speed of advanced 3D canvas components by 40% using React hooks, resulting in a smoother user experience
- Spearheaded the management of machine learning data output using Databricks, resulting in a 30% increase in team efficiency and streamlined data organization

Software Engineer Intern

Levi Strauss

New York, NY

Sep/2022 - Dec/2022

- Contributed to design and development of engaging UI components for a virtual fitting room
- Diligently identified and reported visual defects in layout, color, typography, and images using JIRA, enhancing the product's overall quality
